

POWIS PHOTOPRESS™

THE POWIS PHOTOPRESS™ is a fast and easy to use photo book system that turns silver-halide, dye-sub and inkjet prints into beautiful, distinctive photo books. The finished books rival the quality of traditional mounted albums, but the process takes a fraction of the time and cost. The PhotoPress uses pressure instead of heat to laminate photographic prints to our patent-pending Signature sheets. It is easy to use; anyone can make beautiful photo books in minutes. The photos are arranged with the Signature sheets then a quick cycle in the PhotoPress and the permanent adhesive is activated. The mounted photographs are then ready for assembly into a Powis Photobook Hardcover — considered the finest book covers in the industry. The result is a beautiful photo book, made from prints, ready in a matter of minutes.

MAKING A PHOTOPRESS™ PHOTOBOOK

- 1 Sequence the photos and the Powis Signature sheets together in the PhotoPress.
- 2 Tap the pages for final alignment, close the lid and start the bind process.

- 3 Assemble the completed book into the Photobook hardcover using the Hardcover Guide.

DECORATION

Powis provides all the components you need to create stunning results, including endleaves, decorative headbands and even custom foil titles and graphics with the Foilfast® printer.

EQUIPMENT SPECIFICATIONS

Dimensions: 19.6" D x 22" W x 23" H
(49.8cm D x 56cm W x 58.4cm H)
